

variety Name: VCS-8875
variety type: Hybrid Type

Key Features

- Packing Size: 4 kg
- Seed Quantity For 1 acre: 8 kg
- Plant height: Medium
- Crop Duration: 120 days
- Sowing Time: Both kharif and Rabi variety
- Yield & Performance: Known for high yield potential, with report It is noted for producing long, uniform, and attractive cobs with 16–18 kernel rows.
- Adaptability: Suitable for various growing conditions, including areas with low rainfall, and is often cultivated during the Rabi season in India.
- Plant Structure: The plants are tall and sturdy, featuring a strong root system that provides excellent resistance to lodging (falling over).
- Usage: Primary use is for grain production, though it can be utilized for silage.

variety Name: VCS-8866
variety type: Hybrid Type

Key Features

- **Packing Size: 4 kg**
- **Seed Quantity For 1 acre: 8 kg**
- **Plant height: Medium**
- **Crop Duration: 110-115days**
- **Sowing Time: Rabi Speciality variety**
- **Yield & Performance:** Known for high yield potential, with report It is noted for producing long, uniform, and attractive cobs with 16–18 kernel rows.
- **Adaptability:** Suitable for various growing conditions, including areas with low rainfall, and is often cultivated during the Rabi season in India.
- **Plant Structure:** The plants are tall and sturdy, featuring a strong root system that provides excellent resistance to lodging (falling over).
- **Usage:** Primary use is for grain production, though it can be utilized for silage.

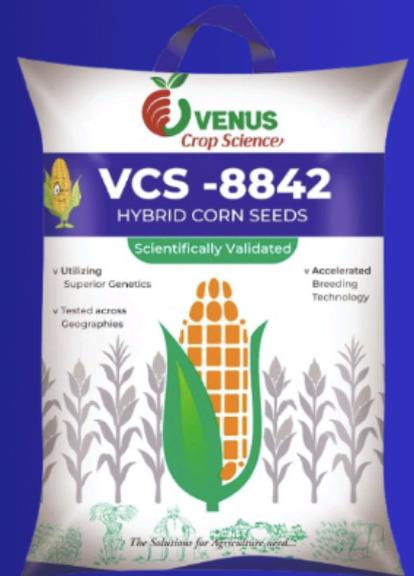

variety Name: VCS-8842
variety type: Hybrid Type

Key Features

- **Packing Size: 4 kg**
- **Seed Quantity For 1 acre: 8 kg**
- **Plant height: 180 to 185cm**
- **Crop Duration: 110-115days**
- **Sowing Time: Both Kharif and Rabi**
- **Yield & Performance:** Known for high yield potential, with report It is noted for producing long, uniform, and attractive cobs with 16–18 kernel rows.

variety Name: Akhanda
variety type: Hybrid Type
Multi -Cut Hybrid Jowar seeds

Key Features

- **Packing Size: 1 kg**
- **Seed Quantity For 1 acre: 4 kg**
- **Plant height: 10-12feets**
- **Crop Duration: 5-6years**
- **Crop cuttings: Infinity cuttings**
- **each cut : 45 days**
- **Sowing Time: kharif and Rabi**
- **Maintain leafy greenness for longer**
- **Highly palatable soft juicy stems with excellent feedback quality.**
- **Quick Maturity ensures early harvesting.**
- **Pest and Disease: Reduces chemical usage**
- **Adaptable: Suitable for multiple soil and climatic zones.**

variety Name: VCS SX-71
variety type: Hybrid Type
Multi -Cut Hybrid Jowar seeds

Key Features

- **Packing Size: 3kg**
- **Seed Quantity For 1 acre: 10-12kg**
- **Plant height: 10-12feets**
- **Crop Duration: 270days**
- **Crop cuttings: 5-6**
- **each cut : 45 days**
- **Sowing Time: kharif and Rabi**
- **Maintain leafy greenness for longer**
- **Highly palatable soft juicy stems with excellent feedback quality.**
- **Quick Maturity ensures early harvesting.**
- **Pest and Disease: Reduces chemical usage**
- **Adaptable: Suitable for multiple soil and climatic zones.**

variety Name: Jersey
variety type: Hybrid Type
Multi -Cut Hybrid Jowar seeds

Key Features

- Packing Size: 5kg
- Seed Quantity For 1 acre: 15-20kg
- Plant height: 8-10feets
- Crop Duration: 205days
- Crop cuttings: 5
- First Cutting-45 days ,Remaining 4: each cut 40days
- Sowing Time: kharif and Rabi
- Maintain leafy greenness for longer
- Highly palatable soft juicy stems with excellent feedback quality.
- Quick Maturity ensures early harvesting.
- Pest and Disease: Reduces chemical usage
- Adaptable: Suitable for multiple soil and climatic zones.

Variety name: Jupiter
variety Type: Hybrid Seeds

• **key characters**

- packing Size: 1kg
- seed rate : 4 kg/acre
- spacing: 30*15cm
- plant height : 8 to 10feets
- crop duration : 1 year
- Crop cuttings: 10 -12cuttings
- each cut: After 25days
- Sowing time: All seasons
- High yielding with best leafy green
- the best Strong performance variety
- Good tillers ,thin stem with narrow leaves.
- Healthy animals and profitable dairy farm.
- very succulent dark green and good palatable fodder.

**Variety name: Morocco
Coriander seeds
variety Type: Hybrid Seeds**

• **key characters**

- packing Size: 2kg
- seed rate : 20kg/acre
- plant height : medium
- Crop Duration : 30-35days
- Sowing time: All seasons
- High yielding with best leafy green
- the best Strong performance variety

Variety name: Sindhuja

variety Type: Improved paddy seeds

• **key characters**

- packing Size: 10kg
- seed rate : 20kg/acre
- plant height: 105-110cm
- panicle length: 25-26cm
- Grains per panicle: 380-400
- Disease Reaction: Tolerant to all major Diseases
- Crop Duration : 120-125days.
- Sowing time: kharif(May-june),Ravi(Nov-Dec).
- Grain type: Medium Bold
- Resistant to BLB(Bacterial Leaf Blight)

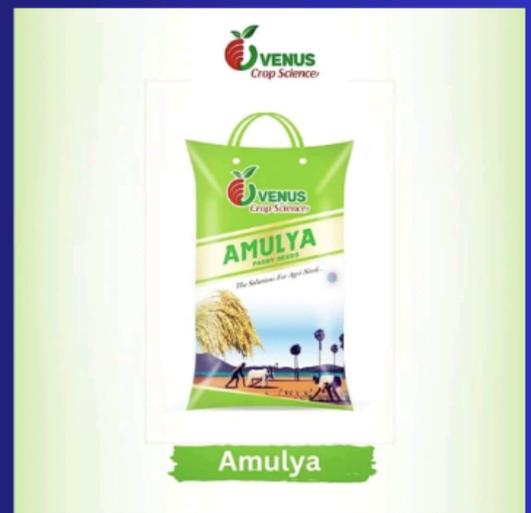

Variety name: VCS-Aman

variety Type: Improved paddy seeds

• **key characters**

- packing Size: 10kg
- seed rate : 10kg/acre
- plant height: 115-120cm
- panicle length: 25-26cm
- Grains per panicle: 350-400
- Disease Reaction: Tolerant to all major Diseases
- Crop Duration : 130-135days.
- Sowing time: kharif(May-june),Ravi(Nov-Dec).
- Grain type: Medium Fine
- Resistant to BLB(Bacterial Leaf Blight)
- Suitable for Quality Consumption

Variety name: VCS-Amulya

variety Type: Improved paddy seeds

- **key characters**

- packing Size: 10kg
- seed rate : 10kg/acre
- plant height: 115-120cm
- panicle length: 25-26cm
- Grains per panicle: 380-400
- Disease Reaction: Tolerant to all major Diseases
- Crop Duration : 130days.
- Sowing time: kharif(May-june),Ravi(Nov-Dec).
- Grain type: Medium Fine
- Resistant to BLB(Bacterial Leaf Blight)
- Suitable for Quality Consumption

Variety name: SRI-RAM

variety Type: Improved paddy seeds

• **key characters**

- packing Size: 10kg
- seed rate : 10kg/acre
- plant height: 100-120cm
- panicle length: 24-26cm
- Grains per panicle: 300-320
- Disease Reaction: Tolerant to all major Diseases
- Crop Duration : 140days.
- Sowing time: kharif(May-june),Ravi(Nov-Dec).
- Grain type: Medium Fine
- Suitable for Quality Consumption

Variety name: RNR-15048

variety Type: Improved paddy seeds

• **key characters**

- packing Size: 10kg
- seed rate : 10kg/acre
- plant height: 100-120cm
- panicle length: 26-28cm
- Grains per panicle: 370-390
- Disease Reaction: Tolerant to all major Diseases
- Crop Duration : 120-135 days.
- Sowing time: kharif(May-june),Ravi(Nov-Dec).
- Grain type: Medium Fine
- Suitable for Quality Consumption

Variety name: VCS - Sampoorna
variety Type: Improved paddy seeds

• **key characters**

- packing Size: 10kg
- seed rate : 10kg/acre
- plant height: 110-115cm
- panicle length: 26-28cm
- Grains per panicle: 350-370
- Disease Reaction: Tolerant to all major Diseases
- Crop Duration : 130-140 days.
- Sowing time: kharif(May-june),Ravi(Nov-Dec).
- Grain type: Medium Fine
- Suitable for Quality Consumption

Variety name: Sharma-55

variety Type: Improved paddy seeds

• **key characters**

- packing Size: 10kg
- seed rate : 20kg/acre
- plant height: 110-115cm
- panicle length: 26-27cm
- Grains per panicle: 380-400
- Disease Reaction: Tolerant to all major Diseases
- Crop Duration : 120-125 days.
- Sowing time: kharif(May-june),Ravi(Nov-Dec).
- Grain type: Medium Bold
- Suitable for Quality Consumption
